

P7

The P7 was developed around a technical platform that ensures maximum wet surface effectiveness as well as providing superior lateral grip and decisive braking characteristics. The unique construction of the P7 delivers the optimum driving comfort and even wear essential for today's most sophisticated sports cars.

- Wider Inner Ribs Improve Braking As Well As Driving Comfort
- Circumferential And Curved Transverse Grooves Provide Superior Water Dispersion
- Solid Outer Rib And Stiff Shoulder Absorb Lateral Forces And Maximize Cornering Grip
- Even Distribution Of Pressure Optimizes Rolling Resistance And Promotes Even Wear

HIGH PERFORMANCE

EUFORI@™ RUN FLAT

The Eufori@ is a run flat tire with excellent performance characteristics. The use of a sidewall made from new generation compounds with lower modulus and fatigue resistance allow the sidewall to support the car's load in case of air loss. The external Ply-Lines Radii designed for comfort in normal inflated conditions also provide good handling levels in a flat condition.

- Compact Shoulder Blocks Enhance Lateral Stiffness And Cornering Force For Improved Dry Handling
- Large Longitudinal Grooves For Improved Drainage Of Water
- Wider Contact Shape For Higher Lateral Force Transmission And Performance Handling
- Must Be Used In Conjunction With A Pressure Sensor Device
